

Venting Mat

Solutions for work and play

Introducing HyperDrii

We all love spending time with friends and family in our favourite outdoor activities - on boats, RV's or camping - but dampness and moisture can spoil the fun. With HyperDrii placed underneath sensitive objects, adequate ventilation is created and the chances of any damage is greatly reduced.

Boating, mattresses and cushions

Cottages, mattresses and patio furniture

Recreation Vehicles, mattresses and seating

Storage lockers, wells and containers

Practical. Affordable. Durable.

Hyperdrii is easy to install, affordable, and very durable. It doesn't take up extra space in places that already have incredibly tight quarters. While some similar products require difficult installation processes like opening up cushions and sewing something inside, Hyperdrii allows you to easily cut and trim to the exact size required.

Practical

HyperDrii is a practical solution that encourages proper ventilation of standing air in poorly ventilated areas in almost any situation.

Lightweight & Flexible

HyperDrii is lightweight and flexible and can be custom fit to any dimension, squeezed into tight spaces and bent around corners.

Cost Effective

HyperDrii is the best, most inexpensive solution to reduce the damaging effects of condensation protecting your expensive bedding.

Durable

Strong enough to withstand very heavy objects being placed on top and still allow moist air to dissipate, even when placed underneath shipping containers.

A Brilliant Solution

HyperDrii is a unique mat venting product, specially designed to increase ventilation for many applications besides the cottage, RV and marine environments. The HyperDrii mat creates a permanent open space between cushions or other heavy objects allowing air to flow and circulate, venting any potential moisture.

Besides acting as a protective layer between your expensive cushions and bedding, HyperDrii can also be used as a screen to prevent debris from clogging bilge pump intakes and floating switches in marine craft. It can be used under marine batteries and coolers and storage compartments where moisture typically gets trapped.

Hypervent reduces moisture buildup by allowing warm air to circulate.

Hypervent reduces chances of mould and mildew forming.

Hypervent prevents warm trapped air promoting circulation.

According to the National Sleep Council, higher humidity levels in your boat or RV can provide a breeding ground under your mattress for a variety of bacteria, including staphylococcus, enterococcus, norovirus, and, in rare cases, MRSA. By facilitating proper ventilation, HyperDrii prevents the growth of dangerous bacteria and fungi.

Product Data

HyperDrii is a carefully formed entangled web that provides for a 90% open-weave design for optimal ventilation and drainage. This entangled matrix is manufactured out of a proprietary composite that is both durable and strong enough to support very heavy objects. HyperDrii has a breathable fabric heat-bonded onto one side that will not damage delicate objects such as cushions or mattresses placed on top.

HyperDrii is sold in 50' rolls and can be easily trimmed with scissors and sized to any desired dimension. It requires no mechanical fasteners to install and can be seamed together to any width.

Specifications

Roll Weight	20 lbs (9.07 kg)
Thickness	.75" (19.05 mm)
Roll Width	39" (99.06 cm)
Roll Length	50' (18.75 m)
Roll Coverage	162.5 sf (15.10 m2)
Rolls Per Pallet	8
Product Colour	White webbing structure/grey backing

Features & Benefits

HyperDrii is extremely durable yet flexible. Its strong polypropylene fibres cannot easily be torn or compressed, even under very heavy weight. It is built to withstand extreme temperatures and will outlast the life of any mattress or cushion.

HyperDrii is also lightweight and flexible and can be custom fit to any dimension easily with ordinary scissors. It's flexible enough to bend and be squeezed into tight spaces and bent around corners.

HyperDrii is easy to clean and dries fast when it gets wet. It's unaffected by detergent, hot water or high pressure steam and is virtually maintenance free! It's the perfect combination of breathable, durable, and flexible.

Strengths

- Woven evenly for maximum strength
- Flexible enough to fit into the tightest areas
- Roll it up and easily store it
- Cleans easily with mild detergent
- Dries fast
- Cuts with ordinary scissors

Only 3/4" Thick

- Ideal to circulate air and release moisture
- Heavy duty strength
- Maintains its shape
- Does not depress with extreme weight
- Keeps your mattress or cushion safe

Easy to Use

- Won't damage your mattress or surface
- Lightweight
- Durable
- Endures extreme temperatures
- Easy to clean

Other Uses

- Prevent rust and clogging
- Placed in bilge areas
- Footlockers
- Building material
- Placed under shipping containers
